

- . Fully Automatic
- . High Efficiency
- . Micro controller based
- . Intelligent Power Management System

- . LED Display
- . Safe and long back up
- . SMPS Charger
- . Individual fuse Protection for cameras

- . Battery Low voltage protection
- . Battery Overcharge Protection
- . Stabilised DC out put even in low voltage
- . Fuse Blow Indications

- . In built Battery back-up
- . Portable type
- . In built DVR connectivity chord
- . Intelligent Load Controller

**CC POWER is a revolutionary design for new generation CCTV technology for power backup. Nowadays most of these sensitive equipments are vulnerable to power fluctuations due to lightnings, over voltage, surge, sags, brownouts.**

**CC POWER generates pure and regulated DC power for CCTV Equipments. CC Power is fully automatic, highly efficient, Micro controller based technology providing safe and long life for your CCTV cameras and Digital Video recorders(DVR).**

**CC POWER is a better replacement for power adapters and UPS required by cctv cameras and DVR. Thereby reducing the failure rate, conversion losses and cost.**

**CC POWER is user friendly and all indicators like Input power indicator, output power indicator, Trip indicator and Fuse blow indications are provided on the panel.**

**CC POWER is integrated with high efficient SMPS charger for stabilised DC output maximising battery performance, life and reliability through intelligent precision charging. Sealed maintenance free batteries (VRLA) are provided for highly efficient battery backup. Inbuilt connectors are provided for individual camera connections. For short circuit protection fuses are provided.**
